## GENERAL INFORMATION

Nature Safe 8-3-5 Stress Guard Fertilizer is formulated to give the end user a complete package of primary and secondary nutrients ideal for amending stressed areas such as closely mowed turf and high sandy soils. It is an excellent fertilizer to use on new turf or during renovation, overseeding and aeration. Nature Safe 8-3-5 has various meat by-product meals that provide slow release nitrogen over a 7-8 week period. Nature Safe 8-3-5 is non-burning and low in salt. Contains slow release nitrogen that leads to minimal leaching. Nature Safe acts as a sponge in retaining moisture and nutrients for plant use, especially in sandy soils. Nature Safe 8-3-5 is OMRI listed and allowed under NOP guidelines validating its use in the production of organic certified crops.
